## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to the apparatus of the flywheel system with mechanical bearings, classified in class 310, subclass 90.
  - II. Claims 19-25, 39 and 40, drawn to the apparatus of a flywheel system with a controller, classified in class 310, subclass 68R.
  - III. Claims 26-29, 33-36 and 41, drawn to the apparatus of a flywheel device, classified in class 310, subclass 74.
  - IV. Claims 30-32, 37 and 38, drawn to the apparatus of a flywheel system with magnetic bearings, classified in class 310, subclass 90.5.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as being used to support a rotor rotation, invention II has separate utility such as being used to control the alternator output, invention III has separate utility such as being used to generate electricity, invention IV has separate utility such as being used to support a rotor rotation without contacting. See MPEP § 806.05(d).

Art Unit: 2834

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dang D Le whose telephone number is (703) 305-0156. The examiner can normally be reached on Monday through Friday.
